

Give more **Intelligence** TO YOUR OPERATIONS

Evalyze is an operations management platform that uses Artificial Intelligence algorithms to automate and optimize the distribution, prioritization and monitoring of activities, resulting in a productivity increase of more than 30% in all operations implemented. Cloud-based, 100% web and fully customizable, the solution is easy to deploy and scale.

YOUR COMPANY HAS SEVERAL SYSTEMS AND TOOLS TO PERFORM DAILY TASKS

MAIN BENEFITS

1. INCREASED PRODUCTIVITY

- **Operational Efficiency**
Achieved through the automation of tasks and the underlying benefits of real-time monitoring and control, resulting in a greater team commitment.
- **Resources Allocation Efficiency**
Measuring idleness levels and Artificial Intelligence algorithms allow to improve the Capacity Planning process, optimizing the number of required operators.
- **Effectiveness**
The rigorous control of effectiveness allows to identify gaps and act to improve this metric.

2. BETTER CUSTOMER SERVICE

- **SLA's Compliance**
The intelligent engine distributes priority activities without allowing operators to choose them, ensuring SLA's compliance.
- **Customer Satisfaction**
The reduction of errors and nonconformities, the standardization of processes and the suggestion of response for each distributed activity guarantee a better service level, reflected in a greater satisfaction of the final customer.
